

October 2015 Newsletter

Issue 22

Greetings

With the Fall season come many updates from your friends at E&I. We've redesigned our 3000 amplifier series, updated the brochure and posted a few blog entries that might interest you.

Getting into the spirit of the season at our main office.

Product Watch

The updated 3000 series is here to stay

From old to new, E&I amplifiers are made to last. Read more about the changes to this line on our [blog](#).

Industry News...

[First Depression Clinical Trial with Focused Ultrasound Begins](#)

Neurosurgeon Jin Woo Chang is leading a study in Seoul, Korea investigating the treatment of

patients with depression using Focused Ultrasound. This treatment may be the solution for those whose diagnosis cannot be managed through medication.

[FDA Approves First Focused Ultrasound System for Treating the Prostate](#)

The availability of a non-invasive procedure within the United States will benefit men who have been traveling overseas for ultrasound treatment for years.

Max and Nigel have picked out their costumes for this year.

Employee Updates

See what the team at E&I has been up to...

Jeff Kopalek, our service manager is in charge of warranty and non-warranty repairs. He has been working at the company for 9.5 years.

Currently, he is working on replacing an obsolete transistor for a customer, as well as re-engineering the 3000 RF amplifier series and drivers. One of the aspects he likes best about working at E&I is the amount of independence and flexibility he has to work on projects.

Karen Lewis, the purchasing and planning manager, has been working at E&I since 2006. She manages all of the transactions that go on within the company concerning everything from new equipment for manufacturing to making sure we always have enough tissue boxes during flu season.

Right now, she is working on adapting to the company's new system. She says this is a time-consuming endeavor because all of the previous processes are obsolete, but she emphasizes that being able to adapt to change is a very important part of serving our customers well. Karen says she enjoys being a part of a very tight-knit team and really values the closeness she shares with her coworkers.

Feedback

As always, we welcome your feedback. If there is a specific topic you would like addressed, please let us know. All questions and comments can be sent to [Kelsey Radomski](#).

Our product brochure has a whole new look. Check out [the redesign](#).
